Site Name

Nottingham Bus Depot

Client

**Nottingham City
Transport**

Sector

Electricity

Kor Energy has joined forces with Nottingham City Transport in the new build of a Bus Depot, Installing a 1000Kva Substation.

Nottingham City Transport will be adding 53 low emission bio-gas powered double decker buses to its fleet, making this an award-winning bus operator one of the cleanest and 'greenest' in the UK.

Super Spec Buses

- USB charging points for keeping your phone battery topped up
- A glass staircase for a brighter interior
- High quality seats for a more comfortable journey
- Quieter engines for a smoother ride
- Audio announcements

A pleasure working with Nottingham City Transport, to help the environment and a cleaner UK.

Lower emissions mean a cleaner city for all!
